

Experiment – 13

Question:

Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software using VMware workstation.

Answer:

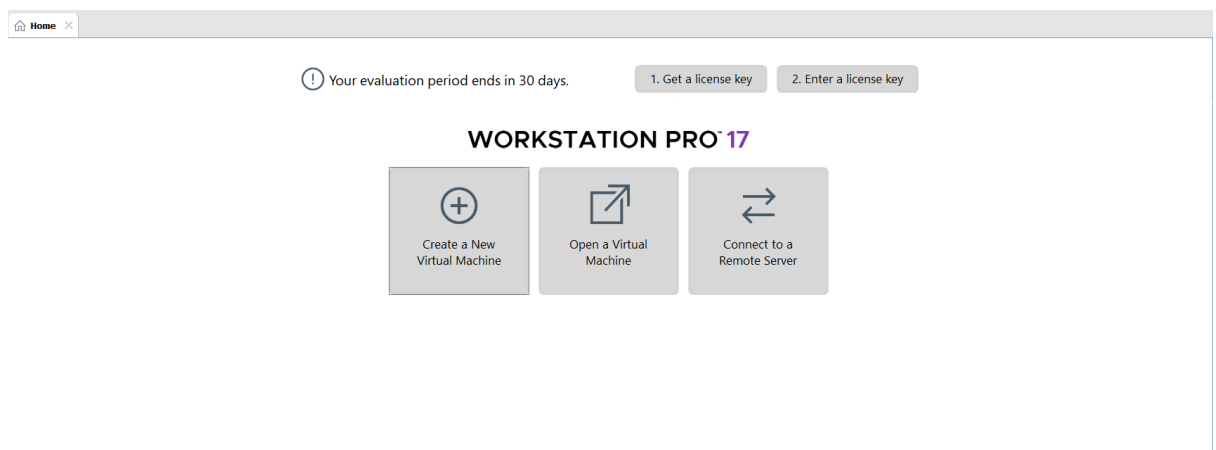

AIM: To create a VM with specific hardware configuration using VMware Workstation.

SOFTWARE REQUIRED: VMware Workstation 17, Ubuntu ISO, Host OS: Windows

PROCEDURE:

STEP 1: Launch VMware Workstation

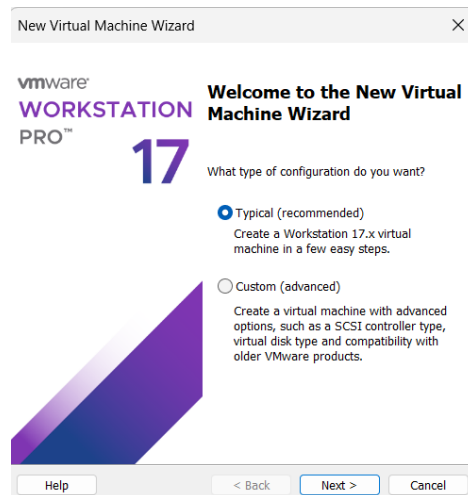

Click Start → VMware Workstation 17

STEP 2: Create Virtual Machine

Click Create a New Virtual Machine

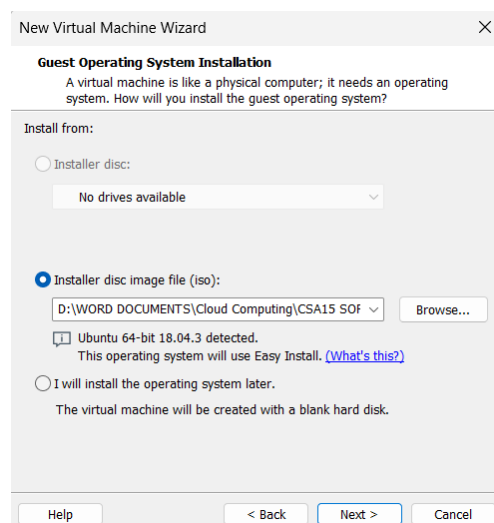

Select Typical (recommended) → Next

STEP 3: Select OS Installer

Choose Installer disc image file (ISO)

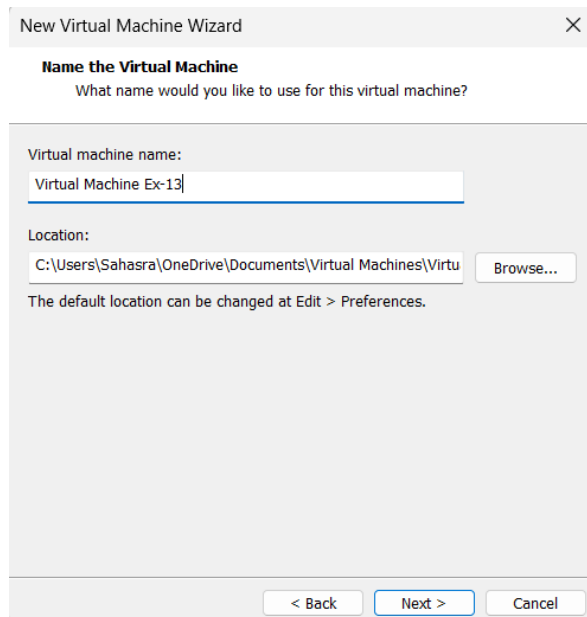

Browse and select Ubuntu ISO

STEP 4: Name VM & Location

VM Name: Virtual Machine Ex-13

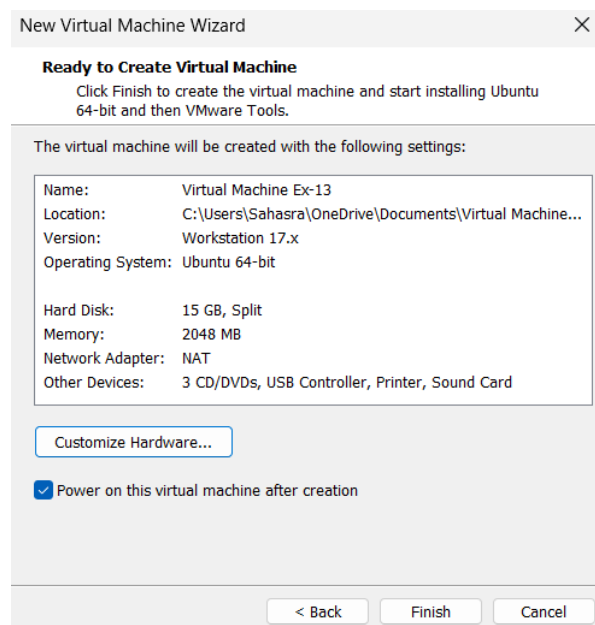

Choose location → Next

STEP 5: Configure Disk

Click Hard Disk

Set disk size to 15 GB

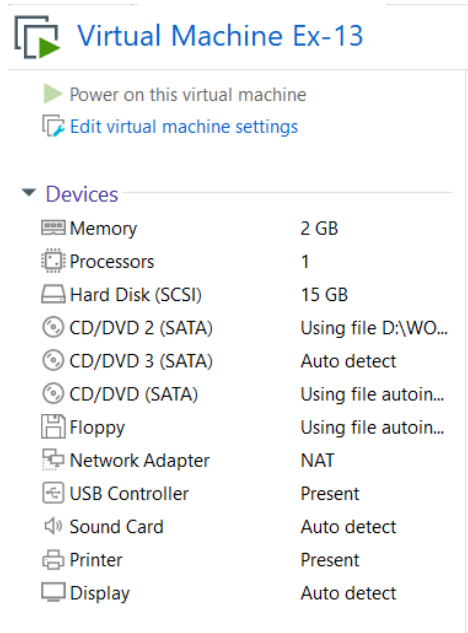

STEP 6: Configure Memory

- Click Memory
- Set memory to 2048 MB (2 GB)

Configure CPU

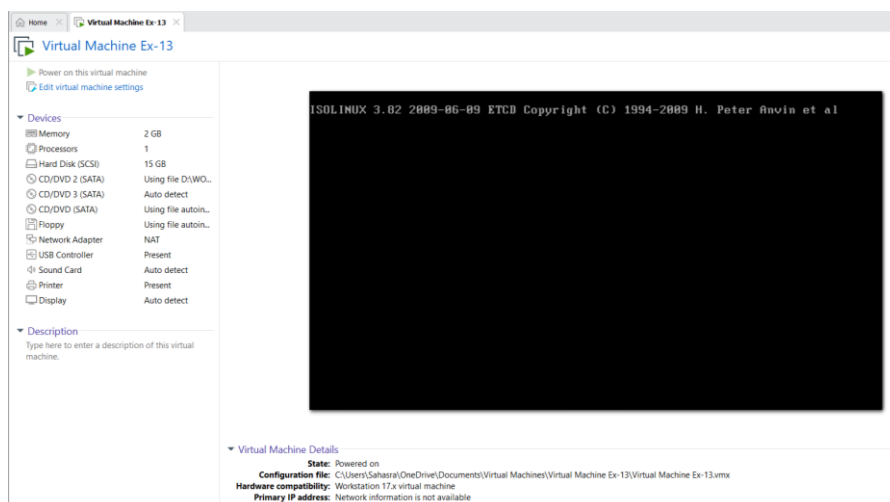

- Click Processors
- Set:
 - Number of processors: 1
 - Number of cores per processor: 1

STEP 7: Save & Start VM

Click OK

Power ON the VM

RESULT: A virtual machine with 1 CPU, 2GB RAM and 15GB storage is created successfully.
